

Our new duplicators allow the user to duplicate huge quantities of DVD or CD at speed without requiring a computer or any previous experience. The Edgedupe simply creates exact mirror images of the data on the source disc. Our Daisy chain solution which incorporates the P762n controller will allow the user to link towers together and copy up to a maximum of 2550 discs. Duplication can be made from a single master DVD, CD or hard drive. The ability to reconfigure the tower to form smaller chains or select standalone mode gives the user the ultimate flexibility. With the Edgedupe, users can now duplicate on demand with no minimum quantity and retain 100% confidentiality by producing in house rather than risking using an outsourced duplication company. This is the ideal solution for data, video and audio backup. Regular firmware updates via www.edge10.com and local technical support, coupled with wide compatibility with the latest optical drives the Edgedupe offers many compelling reasons to buy.

ONE TO ELEVEN

DAISY CHAIN max 1 to 2550

P762 KEY FEATURES

- STANDALONE DVD DUPLICATOR
- USER FRIENDLY – NO EXPERIENCE NEEDED
